The most advanced ROPI grinder yet — refined design, durable build, flawless grinding, and easy printing.

⚠ **Note:** This is the **latest and fully refined version** of the ROPI grinder. If you want the best combination of **design, durability, and grinding performance**, you're in the right place.

Why V4 Stands Out

- This is the **best 3D-printed grinder you can get!**

- **Developed and tested daily** since August 2022
- **Magnet-based design** that feels amazing and works flawlessly
- **Excellent grinding performance** – stash is ground into perfectly sized pieces without clogging
- **Extremely durable** – all parts reinforced to resist impact
- **Comfortable and easy to use**
- **Top chamber** for convenient stash storage
- **Easy to print** — parts are designed for printing without supports
- **Three compartments:** grinding, ground material, and stash
- **Color-swap logo option - no mmu needed**

Printing Recommendations

- **Material:** PLA (PETG works as well; PLA recommended for lower inhalation risk)
- **Supports:** Not required
- **Layer height:** 0.2 mm
- **Infill:** 20%
- **Scarf joint:** everywhere, including inner perimeters
- **If bed adhesion issues occur:** use the top part with integrated brim (can be trimmed off)
- **Visual flair:** try octagram spiral or Hilbert curve patterns on top/bottom layers

Optional Color Logo Printing - No MMU needed

- For a **colored ROPI logo**, switch filaments when using 0.2 mm layer height:
- **Bottom & top cover:** switch at layers 6 and 9
- **Top part:** switch at layers 88 and 91
- **Middle part:** no filament changes needed

Parts to Purchase

Neodymium magnets 5 mm × 2 mm (10 pieces)

Available locally or online (e.g., Amazon for example [here](#)).

Clean-Up & Assembly

- Clean with an **iron brush**
- Use a **heat gun** to remove stray threads
- Trim imperfections with a **scalpel or knife**

Inserting magnets:

- Use a **screwdriver with a flat bit surface**
- Attach the magnet to the screwdriver tip

- Apply a **small drop of glue**
- Push the magnet into place while holding the screwdriver handle

Something to Keep in Mind

- High-quality STL files exported from Fusion 360 are included
- If you enjoy this model, please **download, test, and leave a comment** — I read and reply to all. A like is also appreciated!

Community & Licensing

- **Remixing and personal use are allowed**
- For **commercial use** (e.g. representing a brand, organization, or festival), please contact **info@ropi.tokyo**
- We are also open to **commercial partnerships** to promote and sell the grinder
